

SENIOR HOUSE RENT \$180

**Rent Hiked \$5,
Service Slashed
In Other Dorms**

Beginning in the fall term of this year, the new Senior House on Memorial Drive will be made available to all male undergraduate students. Rent in this newest and most modern of Technology's living units will be at a flat rate of \$180 for room and \$170 for board per man, per term. The fall term will cover a period of twenty weeks, from September 14 to January 31.

Meals, which are compulsory as far as payment is concerned, will be served three times a day, five days a week. Saturdays and Sundays, in addition to the weeks during Christmas, vacation and mid-year vacation are excluded from the meal schedule.

Rent Increased; Service Reduced

Due to increased costs, as well as to changes in the Institute calendar, rent in all of the older dormitories has been increased \$5 per occupant, per term. In addition to the increase, it has been decided that dormitory service will be reduced. Porters will no longer make up the beds each day, but will do so with clean linen once a week.

The new housing unit, which has been known about the Institute as the "new senior house," has now been designated by the Dormitory Board as the "New Dormitory." It will be open to all registered undergraduate students, but members of the class of 1950 will be given preference. The unit will be managed by Mr. Gordon Watson, who at present manages Building 22.

Occupancy Limited in Barracks

Building 22 will be operated in the fall as a housing unit, but occupancy will be limited to 250 persons. If accommodations are available, any resident of Building 22 may be requested by the Dormitory Board to transfer to another unit. The Dormitory Board reserves the right to discontinue Building 22 as a housing unit at the end of the fall term of this year if this is necessitated by the building program of the Institute.

All applications for occupancy in any of the Undergraduate Houses should be filed at the Dormitory Office, on or before May 1. Definite assignments will be made as soon thereafter as possible. Priority will be granted to present occupants of the dormitories who desire to retain their present accommodations.

Streit Will Speak On Atlantic Pact

Mr. Clarence Streit, author of "Union Now", and president of Federal Union, Inc., will speak on "The Atlantic Pact and Union of the Free" in Room 1-190 at noon on Monday, April 18. Streit, a journalist of long experience, who was intimately associated with the League of Nations throughout its history, is famous for his epoch-making book proposing union of the democratic peoples of the world.

His proposal has recently been supplemented by the "Atlantic Union Committee" whose president is ex-Supreme Court Justice Owen J. Roberts.

All students and faculty are invited to attend.

Mann Elected Inst. Comm. Head

Officers and Other Appointees Listed; Amendments Pass

Robert W. Mann was elected president of the Class of 1950 and chairman of the Institute Committee in the class elections held last Tuesday and approved by the Institute Committee on Wednesday. The Committee also approved appointments to the Managing Board of the Tech Show and to the Elections Committee. The three amendments to the Constitution of the Undergraduate Association passed. Following is a list of the elected officers and appointments. Class of 1949

Permanent President—J. Thomas Toohy

Permanent Secretary—Charles W. Holzworth

Class Day Marshals—Thomas L. Hilton, William C. Mitchell, Adrian P. Van Stolk

Class of 1950

President—Robert W. Mann

Vice-President—Thomas J. McLeer
Secretary-Treasurer—John T. Weaver

Institute Committee Representatives—Joseph S. Gottlieb, W. O. Kincannon, Jr.

Class of 1951

President—Gerald S. Burns

Vice-President—William H. Shenkle
Secretary-Treasurer—Stanley J. Marcewicz

Institute Committee Representatives—Walter E. Casey, Arthur A. Wasserman

Class of 1952

President—Wesley J. Haywood

Vice-President—Harold R. Lawrence
Secretary-Treasurer—William E. Moss

Institute Committee Representatives—Edward J. Margulies, Waldo Newcomer

Managing Board of Tech Show
General Manager—Arthur A. Wasserman

Production Manager—Gerard Hartstein

Business Manager

—Richard Stephan

Elections Committee

(all Class of 1952)

Milo M. Backus, Stanley Buchin, James W. Davidson, Edwin C. Dykhoff, Earl R. Heath, James J. Humphries, James Stockard.

Applications Available For Tech House Next Season

TCA recently announced that Tech House applications are now available for the season starting this June. The Tech House, located on the grounds of Round Hill Estate, South Dartmouth, Massachusetts, replaces the old Tech Cabin.

There are three sets of applications obtainable at the TCA office for those groups interested, namely:

1. Summer student groups for weekend trips this summer.
2. Student groups for the school year beginning in September.
3. Faculty groups for weekdays of this summer. The TCA cabinet is itself planning a retreat to Tech House on Monday, April 18, and Tuesday, April 19.

Science - Fiction Predicts Future, Says J. Campbell

The fantastic stories in fictional science magazines are a force in human affairs closely akin to fairy stories and songs. But more than these, they actually have, in many cases, a secure scientific basis. Science Fiction's editor, John W. Campbell, Jr., in a lecture April 13 in Huntington Hall, was further able to explain that this type of literature is not only interesting but also useful.

Avid fans and interested or curious students got a different view of the writing from that of the time-wasting or even detrimental attitude so commonly given it. Mr. Campbell explained that it is an "effort to predict things that might be from the basis of what we know and what we wish to know."

Quite a number of interesting problems in interplanetary travel have been conquered in science fiction. Indeed, many things used in our future "space ships" were first known through science fiction. Mr. Campbell is of the opinion that perhaps the first half dozen space expeditions will be wrecked before all the "bugs" can be ironed out, and with the true philosophy of the magazine gave examples of the problems which will be encountered in "short trips" to the moon, and longer trips to Mars.

United States Becoming Empire Says Professor De Santillana

The following is the text of a paper written for THE TECH, by Professor de Santillana, concerning the future of our nation as a world empire.

By George de Santillana

We have all been told that world leadership has been thrust upon us. This means that we have to develop a set of ideas to face the test. If they are not the right ones, they will be the wrong ones. If we don't learn quickly to develop the right ones, we shall have no time in which to change our mind later on.

The fact is, we have found ourselves compelled to become an empire. Most real empires happen that way. There comes a stampede of small powers seeking the protection of a big one, and the big one has no choice. We may call it a commitment instead of a conquest. It is an imperial commitment none the less, because in the last end what we say goes.

Three Main Points

Which are the points on which we are most apt to give the wrong commands?

I see three main points. One, that we have not yet evolved an economic interdependence with our satellites, and that, on the other hand, we cannot afford to let them go their own way.

The second point concerns public opinion more directly. Fear is always a blind counsellor. The blind

GUEST STAR

Photo by Astrachan

Spotlighting the annual Activities Ball, to be held Saturday, April 16, in Morss Hall, will be Pat Rainey (pictured above) and the Rain Beaus, currently being featured at the Satire Room of the Hotel Fensgate. They will offer a half hour show beginning at 10:30 p.m.

Members of the Activities Ball Committee request the aid of anyone planning to attend the dance to help decorate Morss Hall and the 5:15 Club Room for the Ball. Decorating will be done between 5:00 p.m. and 9:00 p.m. on Friday and about 11:00 Saturday morning.

fear of communism is bound to lead us into dangerous pitfalls. A nation cannot stand in a position of leadership, and yet look to all the world like an agitated spinster feebly waving her umbrella at an inquisitive billygoat. Instead of looking for communists under our beds, and going into dim speculations about the Thirteen Bad Men in the Kremlin, we might ask ourselves how come that millions of people inside our zone of influence, not all of them fools, are willing to accept their leadership.

America and Race Problems

The third point is that three-quarters of the people of the earth do not happen to own a white skin. It is an unfortunate fact that the American is not at his best—in fact, he compares unfavorably with any other nation except South Africa—when it comes to color problems. Now three-quarters of our world are bound to join one camp or the other within the next few years. If we handle things as we handled them in China, we know which camp they will join.

The Unemployed Intellectuals

What the British did in the 19th century was to establish contact with the ruling classes in each country, and a network of influences which led to the use of a restricted but powerful business

(Continued on Page 2)

Killian Announces Staff Promotions; 5 New Professors

President Killian recently announced the annual list of faculty promotions. Included in the list were the following advancements to professorships.

Promoted to the rank of full professor were Dr. Norman Levinson and Dr. Eric Reissner, both of the Department of Mathematics; Dr. Samuel C. Collins, Department of Mechanical Engineering; Professor Gyorgy Kepes, Department of Architecture; and Dr. Charles A. Myers, Department of Economics and Social Science.

Assistant Professor Promotions

Assistant professors who have been promoted to the rank of associate professor are Professor Robert C. Seaman, Jr., Department of Aeronautical Engineering; Dr. John C. Sheehan, Department of Chemistry; Dr. Milton C. Shaw, and Dr. Joseph Kaye, both of the Department of Mechanical Engineering; Dr. James W. Dally, Department of Civil and Sanitary Engineering; Dr. George E. Valley, Jr., and Sanborn C. Brown and Dr. Martin Deutsch, all of the Department of Physics; Dr. Harold S. Mickley, Department of Chemical Engineering; and Professor Elting E. Morison, Department of English and History.

Sixteen Promoted To Assistants

Promotions to the rank of assistant professor were Michael Witunski, and Dominic Amara, both of the Department of Aeronautical Engineering; John J. Mealy, Director of the Bangor Station of the school of chemical engineering practice; David A. Trageser, Director of the Buffalo Station of the school of chemical engineering practice; Kenneth R. Wadleigh, Department of Mechanical Engineering; Dr. Thomas W. Lambe and John M. Biggs, both of the Department of Civil and Sanitary Engineering; Dr. Abdul J. Abdullah, Department of Meteorology; George P. Shultz, Department of Economics and Social Science; George C. Newton, Jr., John G. Linvill, and William K. Linvill, all of the Department of Electrical Engineering; Kevin A. Lynch, Department of City Planning; Maurice E. Shank, Department of Metallurgy, and Theodore Wood, Jr., and David A. Dudley, both of the Department of English and History.

Promoted To Instructors

Members of the staff who were promoted to the rank of instructor were John L. C. Lof, David C. Whipple, Joseph K. Dilliard, Monir A. Kashmiry, Richard B. Adler, Carroll E. Frank, Vinton B. Hass, Jr., Harold M. Lucal, and Denis U. Noiseux, all of the Department of Electrical Engineering; Eugene S. Pulk, Department of Meteorology; Albert J. O'Neill, and James A. Polychrone and Thomas A. Hood, all of the Department of Building Engineering and Construction; Raymond F. Baddour, Assistant Director of the Oak Ridge engineering practice school; Richard B. Palme, Department of Mechanical Engineering; George B. Baldwin, Department of Economics and Social Science; and Carl P. Aldrich, Jr., Department of Civil and Sanitary Engineering.

class. This, in itself, meant already the Liberal Revolution. But there was a corollary to that, with which the British did not know what to do. With the Liberals, came education, and with education, a new social layer of unemployed intellectuals, socially displaced because they could not fit into the old society and because there was no outlet to their ambitions, except in their bureaucracy. This was the situation at the outset of World War II. That system has run its course.

Our time is of mass production. Unlike the British, we are facing competition from the start, for the rival empire is also based on mass production.

But in this game, it is no longer the merchant middle classes who are our partners, it is the working masses themselves. Mass production involves widespread technical skills on one side, and on the other, a majority of the population taking part in the game or prosperity as adequate consumers.

Our Mass Civilization

But here we fall victims to an unfortunate delusion. In this country, by a phenomenon of prosperity, the masses and the middle classes are practically all one. We are a true mass civilization, whose organ of expression happens to be the Chamber of Commerce. Therefore, we also approach the world in this way. For every other country of our orbit, however, and since the beginning of time, the masses have had little to do with the Chamber of Commerce, which express the views of a small privileged business minority. This minority talks superficially like us, but means entirely different things. For instance, they are much more preoccupied with political command and privilege than any are with general prosperity.

Marshall Plan Aid Will End

The impression that I got from clever business leaders and diplomats in Europe was of some such view as this: "The Marshall plan has gotten things going again, but it cannot last for ever. We must get back to normal business." The logical course is to lower wages and living standards, and start again at the level which sound business commands.

What I am saying is, maybe this is what "sound business" commands, or maybe it is not. On the other hand, as the leader in the cold war, or cold peace, against the East, we should be careful of what we mean, what we do, and what we don't do. Our opinion has been expressed in Truman's Fourth Point. It seems to be at variance with that of my distinguished informer. Before we try to get it over to him, we had better figure out the implications ourselves, and what would happen otherwise.

CORRECTION

Inadvertently, the drama shop presentations were listed in "After Hours" as being held this week-end, April 15 and 16. The correct dates for these performances are Friday and Saturday, April 22 and 23.

man about tech

by marvin c. grossman

there was an eclipse of the moon Tuesday night and several of the fellows realized that here was as good a time as any to celebrate something . . . anything, even an eclipse. a number of astronomers gathered in the court between the two undergrad dorm buildings, and hidden caches of fire crackers were brought forth. public address systems started going, featuring phono records, imported for the occasion from the far reaches of lower mongolia.

as the phenomenon progressed, it was decided that here was a fine time for it to rain. after all, what could be more fun than an eclipse with rain. especially if a hundred or more people had their heads innocently turned towards the fading yellow moon in the sky. the rain makers on the roofs went about their devilish task of attaching fire hoses to all available water faucets. buckets, paper bags and wastebaskets were acquired and when the signal was given, the deluge started.

then the idea caught on, and even the more sedate inhabitants of the dorms joined in the fracas and poured still more water from their windows. raincoats and rubber boots became the order of the day as the racket reached new heights, one of the members of the undergrad dormitory committee hastened for John Law, and as this gentleman strolled with the officer towards the dormitory office, some clever fellow, undoubtedly an ex-b-29 bombardier, proceeded to drop a water-filled paper bag squarely on his head.

we understand there will be another eclipse next October. anyone know where we can get a stirrup pump? . . . to help us celebrate of course!

COMPLETE RULES
OF BASEBALL CONTEST

1. Clip coupon at left, fill in your predictions, and mail to Contest Editor, Room 309, Walker Memorial.
2. Anyone is eligible to compete except members of the staff of The Tech.
3. Only one entry may be submitted by any one person.
4. First prize will be a ticket to a world series game played in Boston. If none of the series takes place in Boston, a substitute prize will be awarded.
5. In case of ties, duplicate prizes will be awarded.
6. Contest closes on April 30.

Basketball Team Elects
Morton As '49 Captain

Lou Morton, a junior, has been elected captain of the varsity basketball team for the '49-50 season. Lou who is 6' 4" tall and weighs 190 pounds, has been first string center on the team for the past three years and last season scored 157 points, besides playing a stand-out defensive game.

Golf Team Awaits
Opener on Apr. 20

With its first match of the season less than a week away, the Tech golf team has completed qualifying rounds for the first six berths on the squad. Positions seven and eight will be determined in elimination matches to be held over the weekend.

The team thus far includes three veterans back from last year's squad and three members of last year's freshman team. Playing in first position is Captain Neil Morrison, followed by Dave Schoeffel, Tim Chisholm, Jim Fuller, all on last year's freshman team, and Jack Corrie and Bob Nesbit, both of whom played golf with the Varsity last season.

The first match is against E. U. on Wednesday, April 20. It will be held on the Woodland Country Club links.

Engineers Drop Opener,
10-7 As Wesleyan Scores
Heavily In Late Innings

Dissipating an early four run lead, the Engineer nine lost to Wesleyan in its opening game of the season at Middletown last Wednesday afternoon. The final score was 10-7, with the Cardinals scoring three runs in the seventh and two in the eighth to eke out the decision.

Tech jumped off in front in the first inning as John McMillan led off with a triple, and Cardinal pitcher Shorter walked Johnson, Byrne and Philliou to force in a run. Another tally came in on Jacobanis' single.

Two Runs, No Hits

After Wesleyan had tied the score in the second on a walk, a single,

an error and a fly ball, the Beavers came back with another pair in the third without benefit of a hit. Two walks, two errors, and two flies accounted for the tallies.

The Tech margin became 6-2 in the fourth inning as Gene Lubarsky drove in two runs with a big double. However, from here on in it was mostly Wesleyan, as the Cardinals proceeded to pound the offerings of Beaver hurler Lloyd Marshall. A trio in the seventh brought over by four hits, a walk and an error put Wesleyan in front to stay, as Chappie Spencer drove in two runs with a key single.

Highlights and Sidelights

Warren Berg's nine showed the usual amount of opening-game jitters, but nevertheless performed quite creditably. The difference between the teams could probably be traced to the eight games which the Cardinals already had under their belts. . . . Wesleyan got 11 hits off Marshall—Stan Moulton, who relieved in the eighth, retired two men on three pitchers. . . . John MacMillan was hit in the eye by a foul tip in the second inning and had to retire from the game; however, all he had to show for his injury was a shiner. . . . Fenster and Johnson were outstanding on the defense for Tech. . . . The Engineers were the recipients of nine walks handed out by the Wesleyan hurlers, but did not take full advantage, leaving 13 men stranded on the basepaths.

How About A BIKE RIDE?

With the weather getting better, you'll be wondering how to spend Sunday afternoons. What better answer than a relaxing bike ride in the country?

THE BICYCLE EXCHANGE has hundreds of rental bikes—ALL in perfect condition! What's more, THE BI-EX will give you a FREE CYCLING MAP showing the way to many of Greater Boston's most interesting places. Rates are reasonable too!

So, plan your outing. Rent a bike at The BI-EX.

OPEN SUNDAYS

How much FUN can you cram into a record?

Hear Ray McKinley's musical kidding in "SUNFLOWER" (an RCA Victor Release) and you'll know!

You'll have a lot of fun with Ray McKinley, his band and his vocalist serving up a platterful of "corn" for your listening and dancing pleasure. Yes! Ray knows about musical pleasure—and smoking pleasure, too! As Ray beats it out on his drums—"Camels are a great cigarette—they're mild and full-flavored!"

How MILD can a cigarette be?

Smoke Camels for 30 days—and you'll know!

In a recent coast-to-coast test of hundreds of men and women who smoked only Camels for 30 days—an average of one to two packs a day—noted throat specialists, after making weekly examinations, reported

NOT ONE SINGLE CASE OF THROAT IRRITATION
DUE TO SMOKING

Money-Back Guarantee! Test Camel mildness for yourself in your own "T-Zone." T for taste, T for throat. If, at any time, you are not convinced that Camels are the mildest cigarette you've ever smoked, return the package with the unused Camels and you will receive its full purchase price, plus postage. (Signed) R. J. Reynolds Tobacco Company, Winston-Salem, North Carolina.

TECH SHOW SONGS

Most of the song hits from this year's Tech Show, "O Say Can You Si," are now available, recorded on standard twelve-inch records. To be sold as a set are three records including, "Beaver, Beaver," "Back to Boston," "I'm a Ph.D. from M.I.T.," and many other songs. Also, a recording of the overture to the Tech Show can be bought separately. The price of the set of three records is \$5.00 and the price of the overture is \$2.00. The records can be obtained from Jerry Harstein, '51, in the Dorms or Mary Burke in the Institute Committee Office.

MAN FAINTS
AT LOW PRICES

The high cost of living took its toll in reverse today. Joe Smudge is so used to paying high prices for every-
thing that when he ran into a low
price for a better product, he bit
the dust!

Seems a friend lent him a wonder-
ful razor blade—PAL Hollow
Ground. Joe went to the store to get
some more. "How much?" asked Joe.
"Still only 10¢ for 4," said the clerk.
That's when Smudge fainted.

"What?" said Joe when he came to.
"Why I pay twice that for blades
that aren't half as good."

P.S.: Don't be fooled by price. Try
Pal Hollow Ground yourself. You
still get 4 for 10¢, 10 for 25¢, 21 for
49¢, 44 for 98¢. For either Double
or Single Edge razors.
